

## Studienzeit LK Englisch

Pick a novel that aligns with one of the topics of semesters 1-3. Consult with your English teacher to make sure your novel is appropriate and no one else picked it.

Read that novel on your own time. You are allowed to read during the SLZ.

### Do the following tasks:

1. Prepare a summary of the novel to present to the course. Use visual aids to help make the story more easily comprehensible for someone who has not read the book. Those visual aids could be e.g. AI-generated images to illustrate important settings, character cards to characterize the main characters, sociograms to illustrate relationships between characters, etc.

2. a) Use the AI provided to you by your teacher to create a digital representation of one of the main characters of the novel. It does not have to be the protagonist, but it should be someone who is thoroughly described throughout the novel.

Use the guide provided to you to create the character. You will need a deep understanding of the character, so take some notes while reading. Also, at some point in the process, you will be asked to provide some short quotes from the text as speech samples, so while reading, be on the lookout for sentences that perfectly reflect the character's personality.

Finally, come up with at least three story- or character-related questions that you ask the AI. Submit these questions along with the AI's answers.

**→ Download the whole communication with the AI, the preparation as well as the conversation.**

b) Write an evaluation of how well, in your opinion, the character is represented by the AI, based on the answers it gave to your questions. Consider factors like knowledge of the issues, characteristic behaviour, the use of language, etc. Provide reasons for your assessment. If the result is not satisfactory, suggest improvements for the AI, such as additional information that should be incorporated.

### Relevant for the assessment of your work are:

- the summary of the story and the use of visual aids
- the transcript of task 2a) and
- the reflection on the quality of your AI character (2b).

Upload everything except the text of the summary to Itslearning.

**Have fun!**
